STAR PINK (New)

LYNDON LYON

In these times of Sputniks, guided missiles and daily scientific break-throughs, you want the latest advances and you want them fast. Time is the essence, even with African Violets. The whole world is a testing ground, new mutations are occurring everywhere. Breeders are re-examining the possibilities of specie and inner genetic crosses to give you new colors and forms.

You want to keep abreast of this progress, and to make it possible, we take cuttings and cross pollenate key plants even while they are being tested. Bad guesses are experience but good guesses save many months in getting the very latest advances to you. The most spectacular new developments include the new Star series presented on the following pages and are the result of combining the large symmetrical Star type flower with pink, blue, white, lavender and doubleness, resulting in a dramatic new race of violets proving themselves by winning the grand award at the National A.V. Convention at Cincinnati last April.

And you may be sure no effort is being spared to breed speckles, stripes, frothy green edges and new black shiny foliage types into them and that you will get them from us first.

But what of reds and yellows you are asking? There is increasing evidence that the African Violet may someday have reds and yellows rivaling the most colorful of the brilliantly colored *Gesneria* and it will be sooner than you think.

Meet Betty who is very fussy about the way your cuttings are wrapped and packed. Potted plants of many varieties not listed here are available at our greenhouses. Visitors are always welcome.

ROOTED CUTTINGS

Rooted cuttings when possible will be clumps of small plants ready to break apart and pot up. However, in some cases, due to heavy sales of very new varieties it may be necessary to ship less advanced cuttings: also when temporarily out of a certain variety it may be necessary to substitute a similar variety or return your money as directed.

SHIPPING

Rooted cuttings will be shipped only during warm weather from the last of April until the first of November.

MINIMUM ORDER

Minimum order is \$5.00 plus \$1.00 extra for postage, packaging and Special Delivery, which gets your plants to you quicker and safer. If you do not want them sent Special Delivery please omit 50c.

NOTICE

We increase the size of the clumps of rooted cuttings on orders over \$10.00.

The questions are from you: the thousands of African Violet growers and admirers throughout America; the answers, from twelve experts who live and raise Saintpaulias in ten different regions of the country, and who range from housewives and prize-winning exhibitors to a scientific specialist on heredity.
